AN ANIME STREETWEAR STOREFRONT THAT ACTUALLY SELLS SOMETHING.

Ten pieces, limited stock, no restocks. Browse the drop, pick a size, and go all the way through cart and checkout to a confirmed order — built as a frontend with Next.js 15, TypeScript strict and Tailwind v4.

THE SHOP FLOW

- **Drop listing** with filter and sort held in the URL and applied on the server — shareable, crawlable, works with no client JavaScript.
- **Product page** — five-shot gallery, size picker driven by real per-size stock, sold-out and low-stock states, sticky add-to-cart bar on mobile.
- **Cart drawer** with quantity clamped to available stock and a free-shipping meter.
- **Checkout** — react-hook-form + Zod, Australian address and phone validation, shipping methods that change the total, then a real confirmation with an order number.
- **Also** — lookbook, our story, FAQ with a size guide, 404, and Cmd/Ctrl-K search over names, colourways, tags and kanji.

DESIGN

- **Same brand, different designer.** The reference site's own conventions are not reused — the brand facts are.
- **Near-black room.** The photography is shot on light grey, so every card reads as a lit frame.
- **Square corners everywhere.** A token decision, not an oversight.
- **One bold move.** An asymmetric hero with 一期一会 down the seam — *ichi-go ichi-e*, "one meeting, one chance". It is the Japanese phrase for a moment that cannot repeat, which is the literal promise of a drop with no restock.
- **Motion is one idea.** Every arrival is a hard-edged wipe with a hairline running ahead of it — ink pulled across a screen with a squeegee. These are screen-printed tees.

ENGINEERING

- TypeScript strict plus `noUncheckedIndexedAccess`; the catalogue is typed data and every price passes through one pricing module.
- **No horizontal overflow** from 320px to 2560px, verified against the deployed site on every route.
- The **LCP element never animates in**, the hero entry is pure CSS so it plays in a backgrounded tab, and reduced motion stops everything without leaving content hidden.
- Product images are **immutable for a year**; the hover-only back print is not downloaded on touch devices at all.
- Keyboard: skip link first, visible focus ring throughout, the cart drawer traps Tab and restores focus on Escape.

LOOKBOOK — 30 FRAMES, FILTERABLE BY SHOT TYPE
